FIM New approved paint

Dear Sir or Madam,

Please note that the FIM has successfully tested and so approved a new paint for the marking of the Road Racing Circuits. From now on, the paint to be used for the kerbs, the white lines along the track, for the starting grid and for any other marking on the track must be one of the following:

COLORIFICIO SAMMARINESE	VERNICE AUTODROMO 85500502
DREW PAINTS, INC.	09NS-SERIES W/B CIRCUIT MARKING PAINT
LIMBURGER LACKFABRIK	LIMBOROUTE Circuitline WBP
ORÉ PEINTURE	**RACE LINE**

(see the manufacturers' contact details in enclosure)

Not later than one month before the event, the circuit/promoter must send to the CCR FIM Administration a copy of the order of the approved paint. This order must mention the colours and the quantities per colour.

The paint application method defined by the manufacturer shall be scrupulously followed.

We would like to draw your attention to the fact that other types of paint which are not mentioned above may also be approved. The procedure related to the test to be carried out in view of receiving the approval can be obtained through the CCR/FIM Administration.

These tests could possibly be organised at the same time as the homologation circuit.

We remain at your disposal for any additional information you may require.

With best regards,

Paul DUPARC
CCR COORDINATOR
